Lead Java Developer

Bucharest

About Phi Partners

Phi Partners is a boutique IT consultancy firm providing services and products to clients within the capital markets domain. Headquartered in London, with state-of-the-art near-shore delivery centres in Bucharest, Casablanca, and Sofia, we are known for our talented technology consultants and consistent delivery of projects of all levels of complexity. We work with more than 60 financial banks and entities, including some of the biggest and best-known brands in the world.

About the Client

Phi are supporting an Asia-based Tier 1 investment bank with offices in more than 30 countries across the world, counting over 26,000 employees globally from our world-class centre of excellence in Euro Tower, Bucharest. The client provides a variety of advisory and capital-raising solutions to corporations, financial institutions, private equity, governments, and public-sector organizations around the world. Managing assets of nearly $600bn, they are a major player across the equities and fixed income markets. We are the client's exclusive partner for multiple capital markets technology projects.

About the Programme

With the increasing regulatory-driven business requirements and trade populations, our client aspires to expand their Market Risk Technology (MRT) team's capabilities globally. This initiative involves building a new market risk platform powered by ActivePivot, an in-memory, Java-based Analytical Processing framework, to increase the platform's efficiency in aggregating & analysing data, conducting What If analysis and computing complex measures. For this reason, Phi is looking for a **Lead Java Developer** to join this initiative and support our client by providing exemplary services and executing various projects.

Key Responsibilities

The developer's primary responsibilities will revolve around developing critical business applications within the Market Risk domain and working closely with other Java developers in the team. You will also interact with the client's top stakeholders and contribute to the initiative's development strategies. The successful individual will be working with cutting-edge technologies, including ActivePivot, and obtaining wide exposure to best-in-class technology management.

Key Skills and Experience

The ideal candidate will be a **Lead Java Developer** with:

- A strong track-record of delivering Core Java development initiatives
- Open to acting in a Lead role
- Hands-on-experience working with Spring and Maven
- Solid understanding of CPU/ Memory optimization
- Experience with Big-Data technologies is desirable
- Excellent communication skills; should be able to work and collaborate effectively with the technology team

This is a great opportunity to join a world-leading Capital Markets IT Consultancy with one of the best banking organisations during its most pivotal technology transformation phase. By embarking on this opportunity, you will be able to solidify your Java experience further, become an expert in a vendor technology application system that is highly sought after in the financial world, and work with top developers.

If you are interested in this exciting and unique opportunity, please email me your CV at timothy.harper@phipartners.com and your availability for a phone call so we can discuss it further.
